

REMARKS

Entry of this Preliminary Amendment is respectfully requested prior to the first Office Action and prior to the calculation of the filing fee for the subject application. After entry of this Amendment, claims 1 – 12 are pending in the application. Claims 1 – 12 have been amended.

The Abstract has been placed on a separate page. The Abstract is the same as on the International Patent Application except that reference numbers have been deleted

A hand-written, corrected copy of the specification is enclosed showing the changes which have been made to the specification as required by Section 608.01(Q) and 714.20(1) of the Manual of Patent Examining Procedure. The Substitute Specification filed herewith has been amended to conform the application to current United States Patent practice. The Substitute Specification includes no new subject matter; but does include the same changes handwritten in red in the attached, corrected, original specification. The Substitute Specification also includes the Abstract on a separate sheet as noted in this Amendment.

It is submitted that this Amendment has antecedent basis in the application as originally filed, including the specification, claims and drawings, and that this Amendment does not add any new subject matter to the application. Consideration of the application as amended is requested. It is submitted that this Amendment places the application in suitable condition for allowance; notice of which is requested.

If the Examiner feels that prosecution of the present application can be expedited by way of an Examiner's Amendment, the Examiner is invited to contact the Applicant's attorney at the telephone number listed below.

Respectfully submitted,

YOUNG & BASILE, P.C.

Darlene P. Condra
